

Human Bodyland Dance Notes

This song is very danceable, in the video you can see an idea of a dance step you can do for the instrumental part. You could also take ideas from the children for fun rhythmic steps for this part.

Acting out the words works well and you can make it even more theatrical if you like. The partnering version as seen at the studio was a lot of fun. You could choose the partnering approach, the group approach or do a combination of the two.

You can open up the content with the class and ask for their ideas on how to express the words in movement. We often take a few examples and then choose one for each line of the song. If need be you can offer a few ideas first to give them confidence in the creative process. You are also welcome to copy the children's movements from the video.

Enjoy!
